How to wire Kleinn Lighted Rocker Switch

“KLEINN” logo illuminated schematic

Connect to a 12 volt ignition hot circuit on the vehicle. Horn will not be able to honk when vehicle is not running.

NOTE: It does not matter which wire on the solenoid you connect to the switch.

“AIR HORN” illuminated schematic

Connect to a 12 volt ignition hot circuit on the vehicle. Horn will not be able to honk when vehicle is not running.

NOTE: It does not matter which wire on the solenoid you connect to the switch.
